# DogBone brings 3 powerful DVDs to the Dog Training world.

## Shed Dog Training

SKU: DB STDVD • UPC: 8 52328-00335 1

OVER 3 HOURS OF DETAILED INSTRUCTION & CONTENT!

In this DVD Jeremy Moore, professional dog trainer and developer of DogBone training products, walks you through the process of training a dog to hunt for and retrieve shed antlers. With techniques that bring out your dogs natural abilities using positive motivation, Jeremy shows how to encourage the retrieving instinct and develop a thorough search pattern in the field resulting in a dog highly motivated to find and deliver to hand shed antlers.

You not only get the one on one chapters covering the process of training a shed dog, but also a behind the scenes look into the candid application of each chapter covered. We've included bonus footage filmed during DogBone handler workshops where the content covered in these chapters is then applied.

## Puppy Training

SKU: DB PTDVD • UPC: 8 52328-00338 2

APPROXIMATELY 1 HOUR LONG.

In this video, professional trainer Jeremy Moore walks you through what happens first when you bring your pup into the house. First things first means just that. Your training starts the day you bring your dog home and knowing what to be prepared for is one key to finding success. The essential things that you will want to and need to focus on in order to prepare your pup for building a solid foundation, from house breaking to crate training, sometimes knowing what habits to avoid can be just as important and instilling the desirable ones. By developing a solid plan and then executing with consistency and repetition, Jeremy will show you why he thinks this should be considered "raising dogs" rather than "training dogs".

## Building a Solid Foundation

SKU: DB FTDVD • UPC: 8 52328-00339 9

APPROXIMATELY 3 HOURS LONG.

In this video, professional trainer Jeremy Moore covers how to build a solid foundation under your dog. That foundation is what we believe is an essential part of every dogs makeup regardless of what the end goals may be. Without a solid foundation, you cannot build a tall building without it falling over, the same is true with your dog. We will use several dogs ranging from the age of 12 weeks old up to 3 years old as a way of showing the steps of incremental training. Detailed demonstration of the basic commands- sit, stay, heel, here or recall. That's it, nothing fancy but completely necessary. Each skill is outlined and demonstrated in chapter form and also supported by footage of real life application filmed candidly during Jeremy's DogBone Handlers Workshops.
